SUMMARY

I completed high school at TED Alanya College with Full Education Scholarship. I graduated in 2022 from the Information Systems Engineering program that I started in 2017, with a high honor degree (GPA 3.6/4). I started my career as SAP Technology Consultant by developing applications in ABAP programming language. I possess professional experience in various industries, including automotive, banking, e-transformation and human resources, specifically focusing on software development.

Currently working as a Software Engineer in the banking industry.
